- **Project Management** – we provide project management services and deploy world class project management methodologies to initiate, plan, execute, control and close IT projects
- **Onsite, Offsite and Offshore Projects** – to provide cost effective solutions to meet your business needs

On-site, Off-site & Off-Shore Project Services

We deliver the solutions based on your needs –

How do you find the right consultative organization? You start with Key Solutions, Inc., a leader in meeting the escalating demands for expertise in software development and implementation.

We offer our clients more choices before the project Starts by offering the choice of Onsite, Offsite and Offshore Development. The result in the case of Offshore work is reduced cost for the client.

Onsite Project Services: we provide a full time staff of technical experts and consultants to work directly under your supervision at your location so that you have maximum control based on your needs.

Offsite Project Services: Project execution at our facilities with a dedicated Project Manager and a team of technical experts. Our facilities are equipped with multi platform environment for in house development. Our project management teams continuously co-ordinates and communicates with your management team.

Offshore Project Services: Our offshore facility is well equipped with state of the art infrastructure and highly skilled professionals to provide world-class project services at highly reduced costs. Our project management teams continuously co-ordinates and communicates with KSI US Project Managers and with your Project Management team.

KSI earned a reputation with its customers and industry peers for delivering quality IT services at competitive prices and “**on time completion**”.

Our commitment to quality, customer satisfaction, and lasting business value has been rewarded with a high percentage of repeat business and steady growth in new customer accounts. Much of the growth has been in the form of outsourcing, a process whereby customers use Key Solutions to help in house staff complete projects faster and with-in budget.

In the end, Key Solutions is a focused top-tier business provider with the expertise and value space that allow you to have the best IT solutions without sacrificing value quality and value.
